

# Innovating Unique Oligomers for Over 30 Years

Bomar, formerly Dymax Oligomers & Coatings, is a leading innovator of advanced-performance materials for energy (UV/EB), light, and other free-radical cure applications. For more than thirty years, our oligomers and coatings have been used in a multitude of energy-cure applications worldwide. We have coupled our technical strength in acrylate and urethane chemistry with a strong emphasis on new product development. Our scientists synthesize a broad range of select specialty oligomers, custom-designed to satisfy the unique performance requirements of emerging application technologies, while providing customers an edge in formulating products with outstanding performance, reproducibility, and cost effectiveness.

At Bomar, we enjoy working with companies that are looking for something different; especially those developing cutting edge applications for energy-cure systems. Driven by a culture of innovation, we thrive on the development of proprietary oligomers that are tailored to the unique application and performance requirements of our customers. In addition to our line of oligomers, we provide assistance in coatings formulation, custom blending, toll manufacturing, and contract manufactured coatings solutions.

## Product Offerings

- Multifunctional Acrylates
- Polyester Urethane Acrylates
- Polyester Urethane Methacrylates
- Polyether Urethane Acrylates
- Polyether Urethane Methacrylates
- Hydrophobic Oligomers
- Dendritic Oligomers
- Polybutadiene Urethane Acrylates (PBDUA)
- Polycaprolactone Urethane Acrylates
- Water-Dilutable Oligomers
- And more!
