RE: Conflict Minerals

To whom it may concern:

This letter is to assure you that Dymax Corporation does not intentionally add any conflict minerals (tin, gold, tantalum (coltan) and tungsten), to its ultraviolet (UV) and visible light curing products, and activator curing metal bonding adhesives. Furthermore, whenever tin products are used in our oligomers & coating products, we have been assured by our suppliers that they do not originate from the Democratic Republic of Congo (DRC).

If you have any questions, please feel free to contact us at Product_Regulatory@Dymax.com.

Sincerely,

DYMAX CORPORATION

Mark Pettegrew
Global Director, EH&S and Product Regulatory

Technical data provided is of a general nature and is based on laboratory test conditions. Dymax does not warrant the data contained in this bulletin. Any warranty applicable to the product, its application and use is strictly limited to that contained in Dymax standard Conditions of Sale published on our website at www.dymax.com/pdf/Conditions_of_Sale.pdf. Dymax does not assume responsibility for test or performance results obtained by users. It is the user's responsibility to determine the suitability for the product application and purposes and the suitability for use in the user's intended manufacturing apparatus and methods. The user should adopt such precautions and use guidelines as may be reasonably advisable or necessary for the protection of property and persons. Nothing in this communication shall act as a representation that the product use or application will not infringe on a patent owned by someone other than Dymax or act as a grant of license under any Dymax Corporation Patent. Dymax recommends that each user adequately test its proposed use and application before actual repetitive use, using the data in this communication as a general guideline.
