New Bomar™ Oligomers Guide Simplifies Product Selection
Enhanced Guide Provides Easy-to-Use Product Information

Torrington, Connecticut – November 30, 2012... Dymax Oligomers & Coatings has released a new, enhanced Bomar™ Oligomers Selector Guide. This comprehensive guide provides extensive technical data on the company's leading [UV-cure oligomers](#). It's intended to help manufacturers choose the appropriate oligomer and compatible dispensing and curing equipment for their specific application. The guide is available for download at www.dymax-oc.com.

Extensive technical data is presented for the company's oligomer line and select developmental oligomer chemistries. Several useful reference charts and tables provide information such as viscosity and T_g, substrate adhesion, and durometer scales. The guide also includes information about customized coating solutions, Dymax UV light-curable adhesives, and compatible dispensing and curing equipment. Dymax Application Engineers are available to help match the oligomers and coatings with the appropriate equipment to simplify process development and validation while optimizing both performance and cost savings.

For additional information, visit www.dymax-oc.com or contact Dymax O&C Application Engineering at O&Ctechnical@dymax.com or 860-626-7006. Dymax Corporation develops innovative oligomer, adhesive, coating, dispensing, and light-curing systems for applications in a wide range of markets. Major markets include aerospace, appliance, automotive, electronics, industrial, medical device, and metal finishing.
